More than  
joint projects

ITS mobility has many years of experience in initiating, applying for and coordinating joint research projects on regional, national and international level. We furthermore act as a back-office for industry consortia and project networks. A selection:

**CAR2X** The wireless communication of vehicles among each other and with traffic infrastructure will make future mobility safer and more sustainable. Since 2004, ITS mobility acts as the administrator of the European **CAR 2 CAR Communication Consortium**, and is involved in funded projects on regional, national and EU-level regularly. ITS mobility for example coordinates the pilot project **C-ROADS Germany**, which trials C-ITS in a real traffic environment, and contributes to harmonised European specifications.

**eCALL** The automatic emergency call "eCall" is one of the core topics of ITS mobility. Rescue services shall reach the place of an accident faster and more targeted. We have decisively driven forward the conception and testing of the pan-European eCall in the **HeERO projects**, and we have supported the upgrade of the rescue control centers. Already for many years, we're organising the **eCall Days**, the largest conference on the eCall development and research perspectives in Europe.

*„We're looking forward to your ideas. Feel free to contact us!“*

Hinrich Weis,  
Managing Director of ITS mobility e. V.

## Would you like to become a member?

- ITS mobility provides you with the latest news from the mobility sector, research and projects, and informs you about relevant events, recent tenders and funding programmes.
- We invite you to free network events to bring you into conversation with further ITS experts, future cooperation and project partners.
- Members of ITS mobility join our symposia, expert conferences, seminars and workshops at a discounted rate.
- Take your chance and become part of a strong network for intelligent mobility.

# ITS mobility

The leading network for  
**intelligent mobility**  
in Northern Germany

## Our network shapes the mobility of the future

- ITS mobility is a network that connects partners from industry and research – regionally, nationally and internationally.
- With united forces, we have a good knowledge of the automotive sector, and a good sense for mobility trends.
- At ITS mobility, you find motivated fellow campaigners for your innovative ideas, and the right contact person for each open question regarding mobility.
- Our events and projects form an ideal platform for the direct exchange of knowledge and experiences.
- We introduce young scientists to intelligent mobility concepts.

**+200**  
members

### 113 SMEs

Small to mid-sized enterprises are strongly represented in our cluster, and are connected with...

### 20 LARGE INDUSTRY PARTNERS

playing a leading role and driving innovations in the mobility sector,

### 30 RESEARCH INSTITUTIONS

forming the scientific cornerstone of our network,

### 40 NETWORKS AND EXPERTS

linking our cluster to other regional, national or international networks affiliated to intelligent mobility and related topics.

**„What is my advantage of joining the network?  
At ITS mobility, industry and research work together in strong project teams!“**

*Manfred Miller, Managing Director of NORDSYS GmbH*

**+40**

professional events per year

### EVENTS

ITS mobility organises symposia and conferences on current technological developments and research topics of the mobility sector, such as driver assistance systems, alternative drive systems, lightweight construction, or traffic safety. Take advantage of our offers and take an active part in our events – as participant, exhibitor, sponsor, or speaker.

### WORKSHOPS

ITS mobility realises seminars, workshops and task forces in which science and industry actively share knowledge and experiences. We provide organisational support, we moderate workshops, and we acquire qualified speakers out of our multi-branched network. Join the think tank for the mobility of the future!

**12** newsletters per year

Keep yourself updated with ITS mobility!

In our electronic newsletter, we regularly inform you about latest activities in our cluster, interesting events, relevant congresses, fairs and exhibitions, news from our network and cooperation partners, as well as recently started projects. We furthermore provide you with latest news from our network in mailings, professional publications, and social media.

**„ITS mobility efficiently brings together the competencies from research and industry. In this way we create an open dialogue between the mobility industry and research in Northern Germany.“**

*Prof. Dr. Katharina Seifert,  
Director of the Institute for Traffic Systems Technology  
of the German Aerospace Center e. V.*

**30%** new cooperation

The network of ITS mobility covers all facets of mobility research and economy. We bring you in contact and support the dialogue with experts from science and industry, small and medium enterprises, associations, administration and other networks. Moreover, we pool the expertise of our partners in joint trade fair appearances, projects, and events.

**Added value for your organisation**

- ITS mobility supports you in positioning your organisation in the mobility sector.
- We connect you with decision makers from industry, research and administration.
- We provide you with advice on project and event ideas.
- We strengthen your company presentation through joint stands at fairs and exhibitions.

**70%** know how transfer

The network of ITS mobility stands for a powerful, direct knowledge transfer between mobility science and industry. ITS mobility also promotes the next generation: Pupils and students take part in our events free of charge. We introduce them to intelligent transport concepts in special projects, and arrange internships in mobility research and economy.
